

Logarithms Test Corrections "How-to"

Step 1: You may fix ANY incorrect question. I would like each of you to fix the questions from standard OA.5.

Step 2: Correct the test question on a different sheet of paper.

Step 3: Analyze your error. Explain what you did wrong the first time. If you didn't understand the problem, say so. What did you do (or what did you use) to "get it" in order to correct the question.

Step 4: Staple this to the front of your test and turn in to the first hour basket. Your test scores will be re-evaluated and adjusted over the weekend.

I will see you Friday!
